Bright Coffee Shop Sales Analysis: Jan–June 2023

Driving Revenue Growth through Data-Driven Insights

PRESENTER
Junior Data Analyst

DATE
October 12, 2026

Business Objectives and Key Questions

Our mission is to **grow revenue** and **improve product performance.**

Key questions we're answering

Which products generate the most revenue?

What are peak sales times?

What sales trends exist across products and time?

Which products underperform and how to improve?

01 Business questions → **02** Data source & ingestion → **03** ETL & processing → **04** SQL analysis → **05** Excel & dashboards → **06** CEO decision support

Data Processing and Analytical Workflow

Turning raw sales data into **actionable insights.**

01

SOURCE

Bright Coffee Shop sales dataset from Excel (149,116 records)

02

VALIDATE & CONVERT

Data validation and conversion to CSV

03

CLEAN & PREPARE IN DATABRICKS

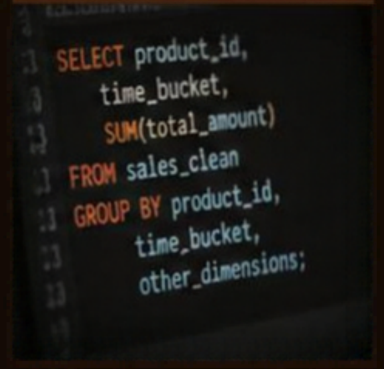

Fix decimal commas
Cast numeric fields
Create time buckets
Calculate total Amount

04

SQL GROUPING & AGGREGATION

Group by product, time bucket, and other dimensions

05

EXPORT PROCESSED DATA

Export cleaned and aggregated tables to Excel

06

ANALYSE & VISUALISE

Build pivot tables and dashboards for decision-making

Key Sales Findings from Dashboard

$698,800 **total revenue** from Jan–June 2023

66.7% **coffee 38.6%** and tea **28.1%** together of total revenue

89% **coffee, tea, bakery,** and drinking chocolate combined of total revenue

Top **“Others”** leads overall revenue **location 6** is the top named location

1–2 product details **1 and 2** drive the highest transaction quantities, followed by **3**

CEO Recommendations for Growth

01 → Run targeted campaigns during slow time slots

02 → Stock more of top sellers like Coffee and Tea

03 → Promote underperforming items to balance the portfolio

04 → Automate daily sales reporting for faster decisions

05 → Track performance across store locations for better insights

From Raw Data to Strategic Decisions

01
raw transactions validated, cleaned, and enriched via ETL

→

02
data aggregated and analyzed with SQL queries

→

03
visualized in dynamic Excel dashboards for clarity

→

04
patterns translated into business decisions

→

05
decisions support CEO goals and drive growth

Data-driven insights powering better decisions and sustainable revenue growth.

Data to Decisions

Ready to discuss next steps and accelerate impact.
